

Functional GmbH - IT / Cloud / Data

We are a new generation cloud and software engineering company highly specialized in Microsoft Azure and CNCF. More on our website.

Azure Data Engineer

Trainee, Junior, Intermediate

City: Hannover; Starting Date: At the earliest possible; Renumeration: Depends on experience

Working field

As an Azure Data Engineer, you'll become a key player in shaping and optimizing a dynamic data analytics platform powered by Azure cloud services, with a particular focus on Azure Data Explorer (ADX).

This is not just about keeping things running - it's about driving innovation and excellence in every aspect of platform management! You'll dive into monitoring, alerting, and performance optimization, ensuring the platform is running at peak performance.

You'll champion security hardening, guaranteeing data integrity, while mastering FinOps to keep costs efficient.

And with a professional's touch, you'll handle infrastructure as code, provide trainings, and work closely with stakeholders to take care of all the functional requirements.

Essentially, you're involved in every part of managing a high-quality, professional data platform.

Requirements

* Curiosity for Cloud Technologies: You have a natural curiosity for how cloud services work, and you love diving deep into Azure or other cloud platforms. You're always eager to experiment with new tools and technologies to stay ahead of the curve.

* Passion for Data: You're fascinated by the power of data and enjoy the idea of working with massive amounts of IoT data to unlock insights, improve processes, and drive innovations in data analytics.

Interest in Collaboration and IT Dynamics: You're keen on understanding the mechanics of modern IT collaboration—whether it's how agile teams communicate or how cross-functional projects are orchestrated. You thrive in dynamic, collaborative environments and love contributing to a shared vision.

* **Problem-Solving Mindset:** Challenges excite you! You enjoy solving complex problems, especially those related to cloud infrastructure, data pipelines, or optimizing system performance.

* **Eager to Learn and Grow:** You're not just satisfied with the status quo; you're always looking for ways to improve your skills and bring new ideas to the table. Whether it's learning infrastructure-as-code techniques, understanding FinOps, or mastering new cloud services, you're ready to grow.

* **Proactive in Monitoring and Alerting:** You understand the importance of keeping an eye on systems and love the thrill of optimizing performance through monitoring, alerting, and fine-tuning systems.

* **Proficiency in German** at a minimum level of B2 (as defined by the Common European Framework of Reference for Languages (CEFR)).

What We Offer

More than functional – our benefits:

* Your choice of hardware

* Jobticket

* Wellpass Gym

* Company Pension Plan

* Workation

* Fully remote (currently, location is restricted to Germany)

* Optional shares of functional by our cooperation kuupers eG (main shareholder of functional)

We value diversity and welcome all applications, regardless of gender, nationality, ethnic and social background, religion/worldview, disability, age, sexual orientation, and identity.

Application
