# think-cell

## C++ Internship (f/m/d)
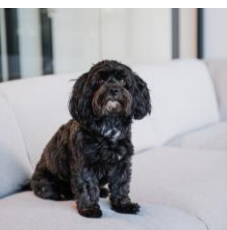

# Gain real, practical experience.
# Enrollment based on your C++ skills

think-cell is the leading data visualization software for business presentations. Since being established in 2002, we have been making the creation of PowerPoint presentations easier, faster, and more enjoyable for more than 25,000 companies (and over 1,000,000 users) around the world. Our mission is to offer the most intuitive user interface for generating complex data-driven charts and slides, while at the same time ensuring seamless integration with Microsoft Office. We work on challenging visualization problems, reverse-engineer Microsoft's code, and reinvent how slides are created. think-cell is the only German company funding the C++ ISO committee delegation, so there is a good chance that components we invent will find their way into the standard.

## Why choose us?

- **Excellent compensation:** Earn a competitive annual salary between EUR 75,000–90,000 from day one.
- **Enrollment based on your skills:** No prior work experience? No problem! Join us solely based on your C++ programming skills.
- **Gain real, practical experience:** Unlike traditional internships, our program immerses you in real-world projects. You'll tackle challenges that mirror those encountered by our development team, gaining invaluable hands-on experience that accelerates your growth.
- **Career growth:** Advance your career to a full-time C++ Developer position with a highly competitive annual salary from the start and a raise to EUR 130,000 after your first year.
- **Relocation and visa support:** We've got you covered! Enjoy full support with your relocation to Berlin, including visa support, a one-way ticket, and up to six months of your apartment expenses on us.
- **Flexible start date and duration:** Choose a start date that fits your schedule, even during your summer or winter break. We just require a minimum of two months full-time commitment.
- **Thesis writing:** Need to work on your thesis? Discuss your topic with our CTO, and we'll make every effort to accommodate it within your work.
- **International team:** Become part of our international team of brilliant minds. Collaborate with experienced Developers, and learn from the best.
- **Language flexibility:** Apply with confidence if you're fluent in English or German—proficiency in just one of these languages is required.
